Education

Vellore Institute of Technology
B.Tech, Computer Science Engineering

Sep 2023 – May 2027 (Expected)
CGPA: 8.54

Matoshree Jr. College
Higher Secondary Education

May 2021 – May 2023
75.33%

New Maratha Highschool
Secondary School Education

Passout Year – 2021
95.20%

Skills

Programming Languages: Python, C++, JavaScript, HTML, CSS, SQL

Frontend: React.js, Vite, Tailwind CSS, Responsive Web Design Node.js, Express.js, Flask, REST APIs

Frameworks: Flask, React, Vite, Tailwind CSS, Tensorflow

Libraries & Tools: Web deployment, Git, Radix UI, Framer Motion

Experience

AI-ML Intern
BharatSkillz Pvt. Ltd.

May 2025 – Jul 2025
Jaipur, India (Hybrid)

- Mastered core machine learning concepts by implementing various supervised and unsupervised algorithms for predictive modeling and data analysis.
- Developed practical workflows for computer vision and object detection tasks, establishing the foundational knowledge required for real-time tracking applications.
- Conducted rigorous model evaluation techniques to validate performance metrics and ensure models were robust enough for real-world deployment.

Projects

TrafficIQ — Smart Traffic Management System 🐙 | *React, Node.js, Express, HTML, CSS*

May 2026

- Created TRAFFIQ, an innovative adaptive traffic control system that uses YOLOv8 and ByteTrack technology to analyze traffic footage and to identify and keep a close eye on vehicles in four lanes. With TRAFFIQ, traditional signal timing systems are replaced with real-time signal management technology based on analyzing traffic congestion on a lane-to-lane basis.
- Designed a smart signal controller with adaptive vehicle class importance and flexible green phases from 8 to 60 seconds, using cyclic fairness, and emergency vehicle preemption.
- Created an entire traffic control software using React, PostgreSQL/SQLite, including features like real-time analytics, management of fines and violations, emergency management of the system.

VisionVogue — Full-Stack E-commerce Platform 🐙 | *Node.js, EJS, CSS, GSAP*

Feb 2026

- Developed a responsive full-stack e-commerce platform with React.js frontend and Node.js/Express.js backend for browsing and purchasing eyewear products.
- Built an interactive Virtual Try-On module with image upload, automated frame recommendations, responsive UI, and GSAP-based animations to improve the product discovery experience.
- Integrated Node.js/Express with MongoDB/Mongoose, implementing authentication, product/order management, admin analytics, and an in-memory database fallback for reliable development and deployment.

Certifications

- Insights on Computational Data Science – Indiana University (IU Indianapolis)
- Master Data Management for Beginners – TCS iON
- The Bits and Bytes of Computer Networking
- Machine Learning – NPTEL
- T-Hub Workshop

Leadership & Community

Event Management Lead, VIT Clubs

Mar 2024 – Sep 2025

Led a 15-member team running logistics, registration & community engagement for events reaching 2,000+ attendees.
