Computer Science undergraduate with practical experience building AI and full-stack applications, seeking a challenging role to deepen my AI expertise and deliver real-world impact.

Education

Vellore Institute of Technology
B.Tech, Computer Science Engineering

Sep 2023 – May 2027 (Expected)
CGPA : 8.53

Skills

Programming Languages: Python, C++, HTML/CSS, JavaScript

Frameworks: TensorFlow, PyTorch, ParlerTTS, Flask, React, Vite, Tailwind CSS

Libraries & Tools: OpenCV, Scikit-learn, Mediapipe, EJS, Git, Pickle, REST API, Radix UI, Framer Motion

Experience

Research Intern

Polynovators India Pvt. Ltd.

Dec 2025 – Jan 2026

Pune, India

- Conducted market and technical research to support the development of a new product, gathering insights on industry trends, competitor offerings, and user needs.
- Collaborated with the product team to evaluate design and feasibility options, contributing findings that informed key product decisions.
- Compiled and documented research findings into structured reports/presentations for internal stakeholders, streamlining the decision-making process.

AI Intern

BharatSkillz Pvt. Ltd.

May 2025 – Jul 2025

Jaipur, India (Hybrid)

- Developed a strong understanding of deep learning, working with key architectures like Convolutional Neural Networks (CNNs) for computer vision tasks and Recurrent Neural Networks (RNNs) for sequence data analysis.
- Applied my knowledge to build a practical Generative AI application. This involved designing and training a text-generation model using a Transformer-based framework to produce human-like text for creative writing or automated content creation.
- Mastered core ML concepts, including supervised and unsupervised algorithms, and gained proficiency in data preprocessing, feature engineering, and model evaluation techniques.

Projects

Binance Trading Bot | Python, Flask, Flask-CORS

Jan 2026

- Built a Python-based Binance Futures Testnet trading bot supporting Market and Limit orders with BUY/SELL functionality through both CLI and Flask web dashboard.
- Developed a live trading dashboard with real-time price tickers, account balance/PnL, open-order management, one-click order cancellation, and activity monitoring.
- Implemented a layered architecture with input validation, error handling, structured logging, and secure .env-based API credentials, with rotating logs for reliable order tracking and debugging.

VisionVogue — Full-Stack E-commerce Website | React, Node.js, Express, HTML, CSS

April 2025

- Developed a full-stack, responsive e-commerce website for eyewear products using Node.js, Express, and Bootstrap 5.
- Engineered a dynamic product catalog with advanced filtering and sorting, alongside a seamless shopping cart and checkout system to significantly enhance the user experience.
- Integrated a robust shopping cart system and streamlined checkout process, significantly enhancing the overall user experience.

Leadership & Community

Event Management Lead, VIT Clubs

Led a 15-member team running logistics, registration & community engagement for events reaching 2,000+ attendees

Mar 2024 – Sep 2025

Certifications

- Insights on Computational Data Science – Indiana University (IU Indianapolis) 
- Master Data Management for Beginners – TCS iON 
- MATLAB Onramp Course – MathWorks 
- Machine Learning – NPTEL 
- Marketing Analytics – NPTEL
